

LAGERSTRÖM  
BALLOTA pergola  
Mounting instructions

01.

Assemble 2 frames, the front and back sides of the pergola.

Each frame is made of 2 leg posts, 2 corner pieces and a cross beam. Parts connect using bolts with the attachment connectors (shown in grey)

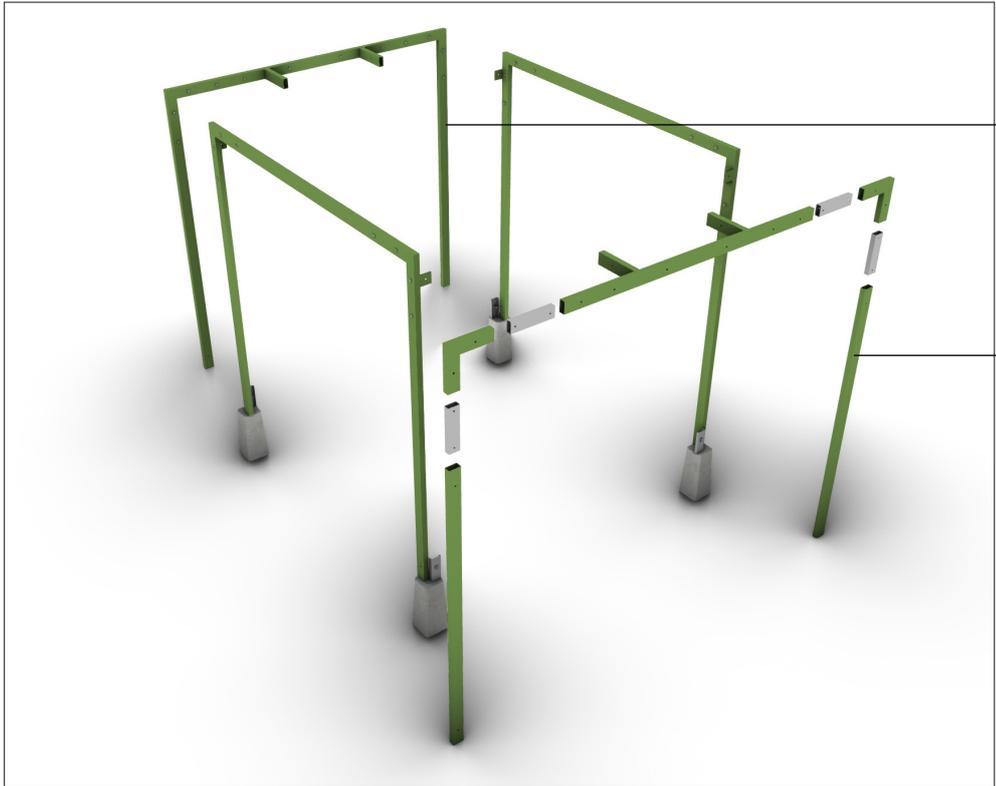

02.

The frames are placed on the concrete foundations and bolted to them. The centers of the foundations create a 260x260cm rectangle.

When attaching the leg posts of the 2 frames, connect also these L-shaped connectors as shown. 4 connectors that will hold the 4 sided structure together.

Mounting instructions

**03.**

Assemble the next 2 frames, the sides of the pergola.

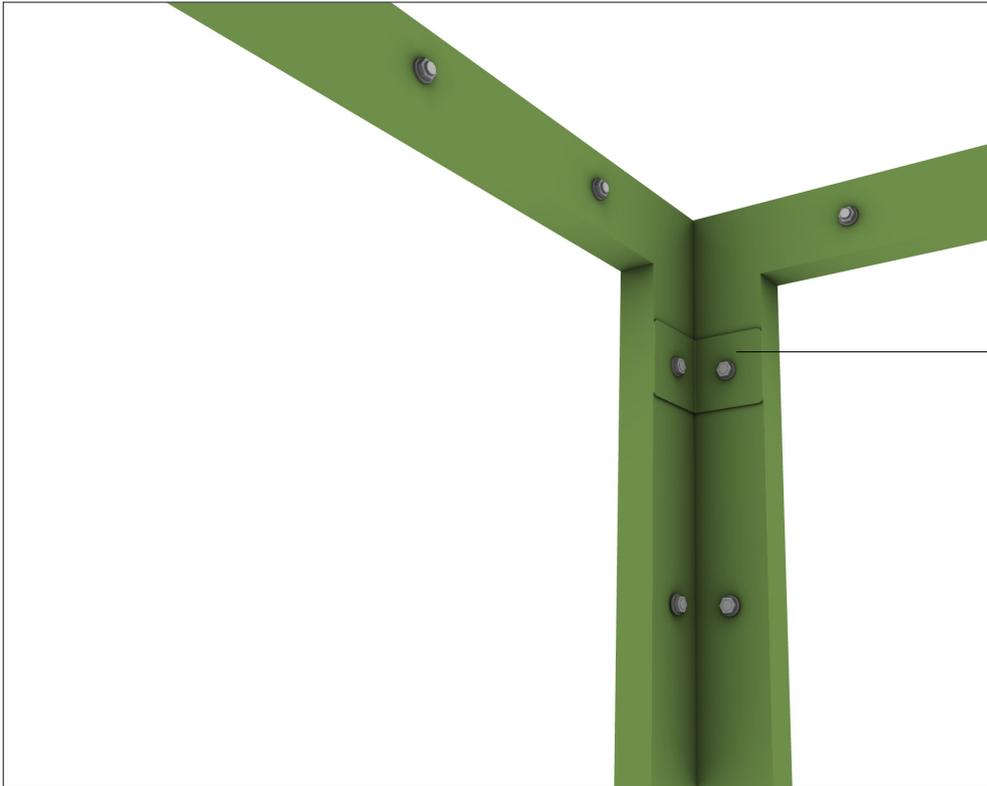

Each frame is made of 2 leg posts, 2 corner pieces and the side cross beam (that has 2 perpendicular bits). Parts connect using bolts with the attachment connectors (shown in grey)

**04.**

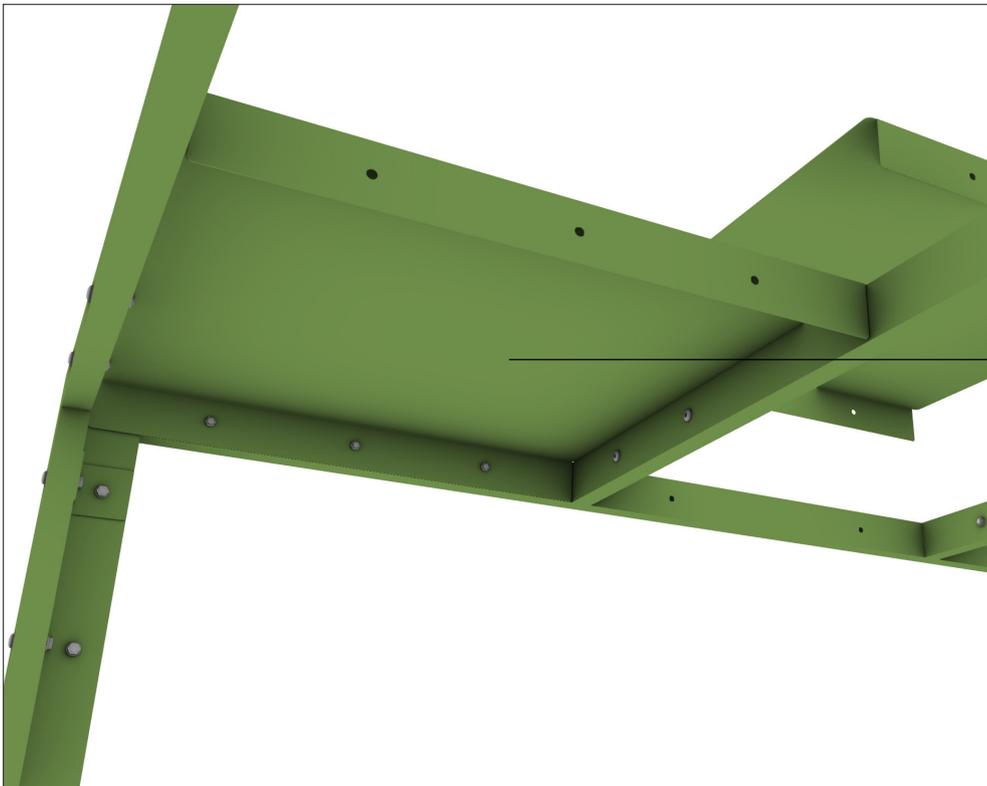

Attach the 2 center cross beams and then place the side frames on the concrete foundations.
