Lagerström

Mandus 1150 - Cast in ground

Instructions

Cast concrete in the hole and let it cure.

Once the concrete has dried, remove the temporary supports.

06.

Dig a hole in the ground in the chosen location for the grill. The hole dimensions should be at least Dia. 70cm and 40cm deep. Then, place the grill in the hole. See that the net handle is pointing towards the wanted direction for the user. Secure the positioning and height with temporary supports. Make sure the bottom edge of the grill base is at ground level. The grill top edge at 85cm over ground level.

The grill is fully mounted and anchored to the ground.
